Confidentiality Notice

The information in this document is confidential information of alvasys automation ag ("alvasys"). Such information and the software described herein are provided under a license agreement and may only be used in accordance with that agreement. The information in this document is provided solely for use by employees, licensees, and system owners of ALVASYS. The content of this document may not be disclosed to others or reproduced for other purposes. Although every effort has been made to ensure the accuracy of this document, ALVASYS is not responsible for any damages of any kind, including consequential damages, resulting from the application of the information contained herein. Information and specifications published here are current at the time of publication and may change without prior notice. This document may be copied by parties authorized to distribute ALVASYS products in connection with such distribution, provided that this is authorized by the contracts enabling such distribution. It may not otherwise be copied, photocopied, reproduced, translated, or reduced to any electronic or machine-readable form, in whole or in part, without prior written consent from ALVASYS.
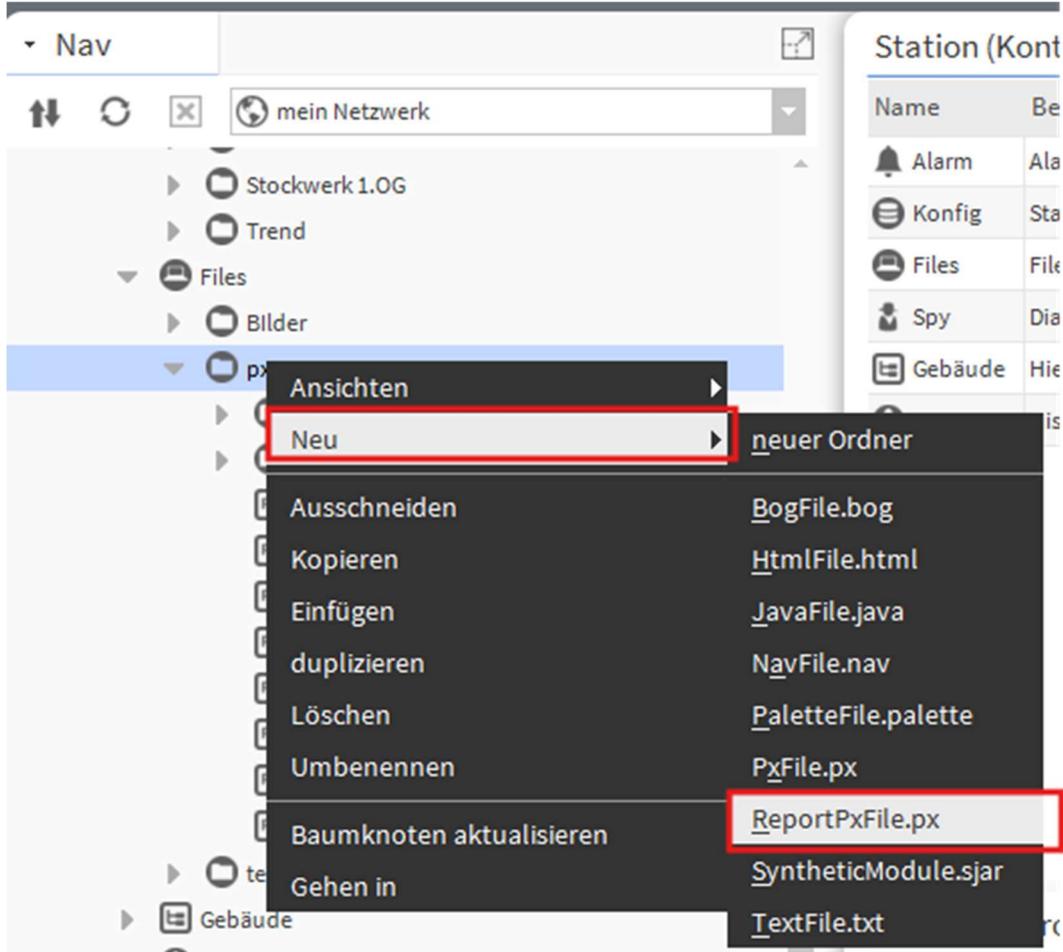

Description

Reports allow you to quickly create information tables from data points. Here is a guide on how to implement them quickly.
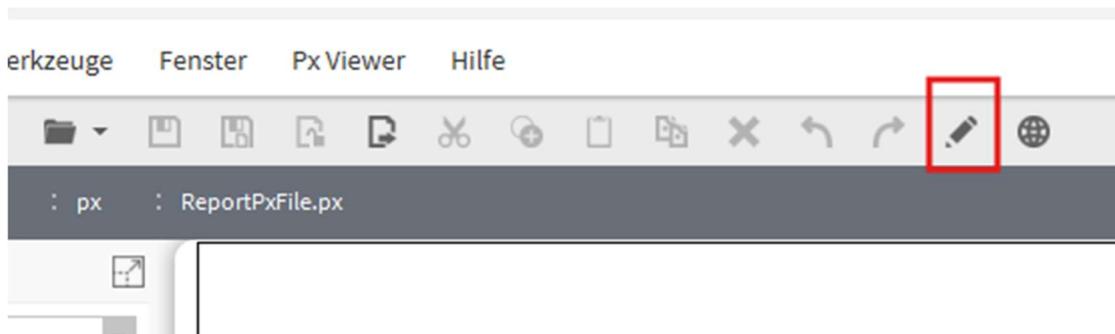

Requirements

Niagara N4

Instruction 1

1. Right-click on the PX folder and create a new ReportPxFile.px.

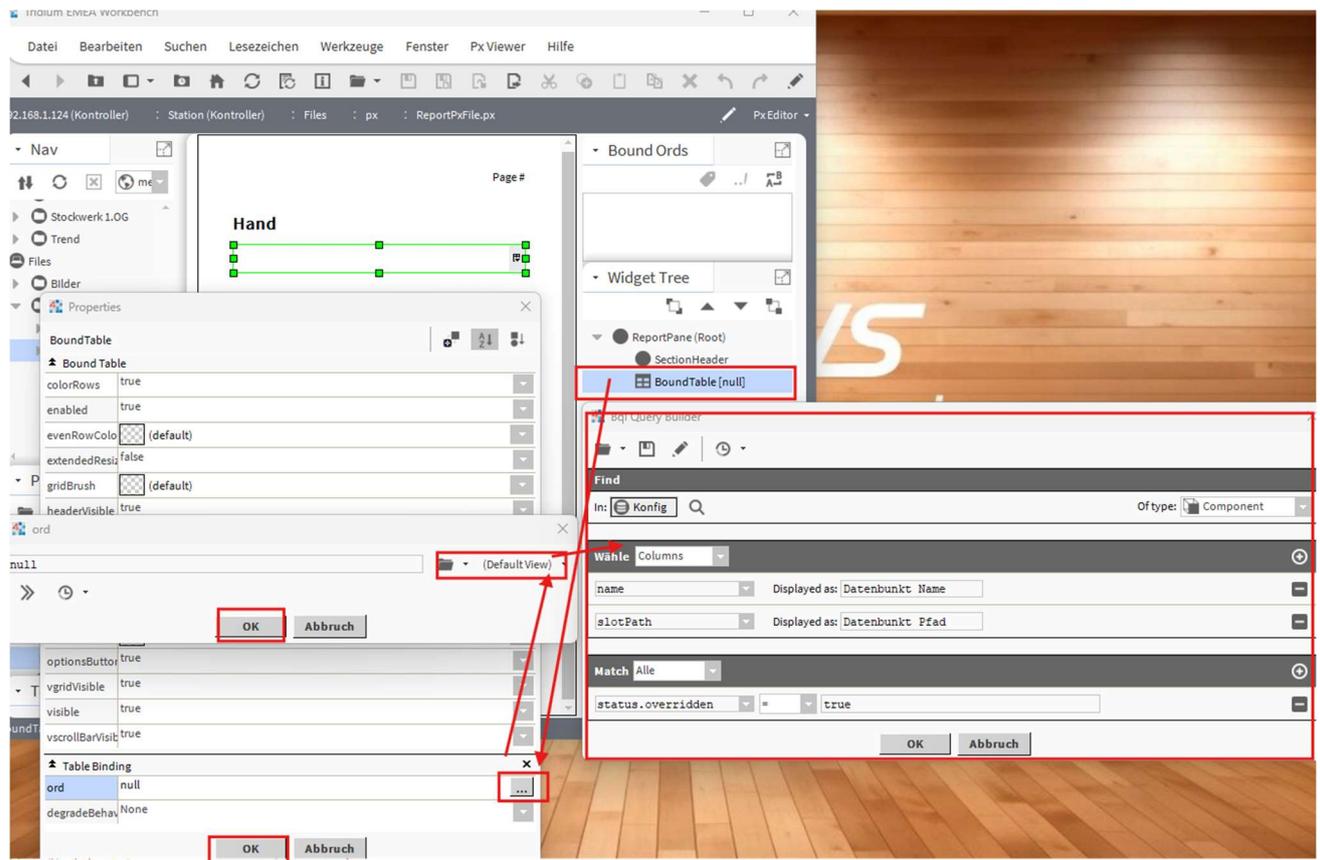

2. Open the newly created PX in edit mode.

3. From the ReportsWidgets, drag the SectionHeader and BoundTable into the ReportPane.

4. Open the properties of the SectionHeader and set the text to "Hand".

Highlight important information in a panel like this. If you want to change the color or style of the area, select one of the options from the menu.

Instruction 2

1. Name simple and completed steps.
2. Add illustrations to the instructions by typing /image.
3. Limit yourself to 3–5 steps per task to avoid overwhelming readers.

Highlight important information in a panel like this. To change the color or style of the area, select one of the options from the menu.

Related Articles

The "Content by Keyword" feature automatically displays related articles based on the keywords you select. To edit the options for these features, select the placeholder and tap the pencil icon.
